

Are you thinking of creating An Outdoor Living Area?

VISTA

VISTA

Cantilevered Umbrella

Vista means view. Make the most of yours under the generous shade of our popular side column umbrellas. The Vista's offset column and expansive canopy maximises clear space undercover, making it perfect for poolside and outdoor dining.

9 freestanding sizes offer extensive shade coverage from 9m² up to 25m² off a single column.

A robust internal gearing system allows the swift & easy operation of the umbrella in any weather.

An optional rotational base rotates the canopy a full 360° to follow the sun throughout the day.

An architectural grade, PVC Canopy, that is waterproof, heat reflective, and UV resistant, keeps customers cool, dry, and sun-safe.

With the addition of extra booms, suspend up to 4 canopies off a single column maximising your clear space undercover.

Accessories such as heating and lighting can be installed to transition your space from day to night.

Purpose built to perform outdoors, the Vista's open canopy has been engineered to withstand wind speeds up to an impressive 118kph.

VISTA

Features

Easy Operation

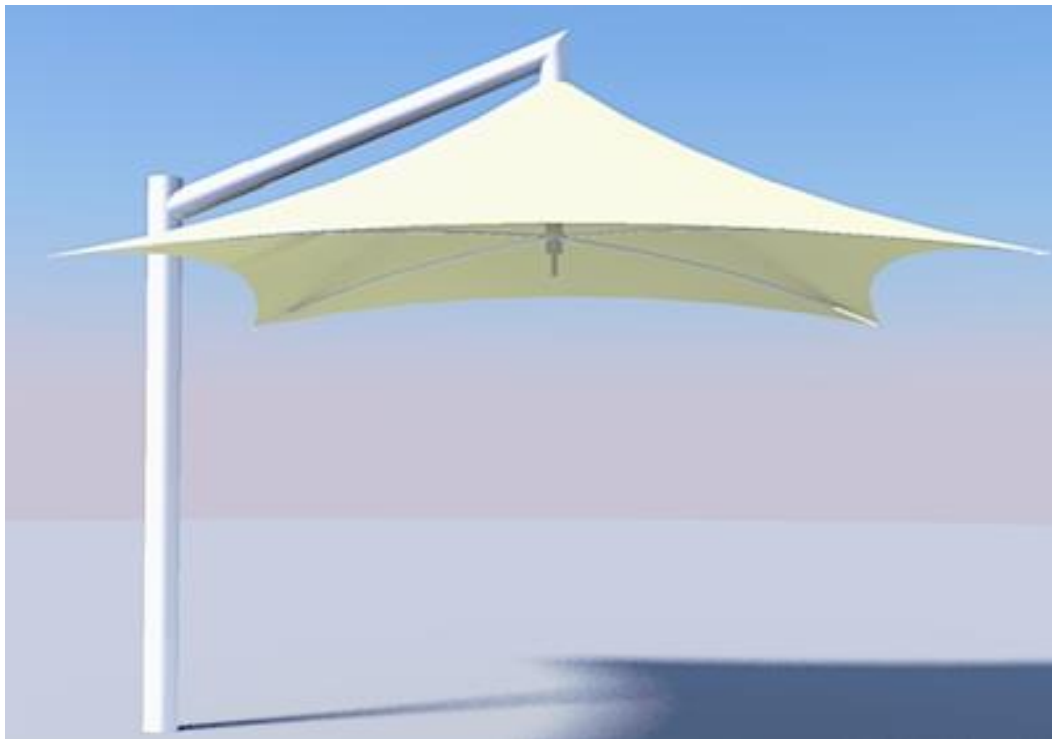

Built for commercial use, the Vista is unique in that it does not require any heavy equipment, or extra assistance to open its sizable canopies. A simple hand wound awning handle connects with a robust internalised gearing system, for quick and efficient operation of any sized canopy, in any weather. The handle is then detached from under the canopy, locking the umbrella safely in the open position, and preventing any unauthorised use.

Engineered for Performance

With umbrella weights between 280 -380kg the Vista has been designed and engineered for permanent fixed installation outdoors. Capable of withstanding windspeeds up to 118kph whilst open, you'll have ample time to retract the umbrella in changing conditions. Once closed, the Vista will stand safe and secure in winds up to 148kph, ready for future use.

Compatible Accessories

Radiant strip heating, LED lighting, speaker systems and power points, can all be pre-wired into the umbrella at point of manufacture to enhance your outdoor experience. Rain diverters can be attached to the Vista's waterproof canopy to channel away water, and removable joining panels can also be added, connecting multiple umbrellas for continuous dry cover, and extended use of your outdoor facilities.

Features

Premium PVC Canopy

A high tensile, architectural grade PVC adds strength and style to the canopy.

Specifically designed for umbrellas, the canopy fabric has been pre-tensioned in manufacture to prevent stretching and tearing after continuous operation.

Tensioned steel cables have been cleverly concealed within the canopy's seams, maintaining shape and stability during use without the need for visible support cables undercover.

Choose from over 40 canopy colours that have been tested and rated on their ability to reflect, absorb and transfer heat, ensuring the umbrella is cool and comfortable to be under.

A permanent UV surface treatment provides superior sun protection with an Ultraviolet Protection Factor of 50+, blocking harmful UVA and UVB rays

Commercial Construction

The Vista's galvanised structural steel frame is assembled with marine grade stainless componentry and powder coated in a colour of your choice, for a smart, easy care, finish

A protective PVDF coating has been applied to the canopy stabilising the colour pigment in the fabric for fade resistance to prolonged sun exposure.

The flame retardant, anti-fungal and dirt repelling properties of the canopy make it easy to keep clean and ideal for commercial environments.

Canopy Dimensions	Coverage	Umbrella Height			Weight
L x W	m ²	A	B	C	Kg
Square Canopy					
2.4 x 2.4m	5.7	3.76m	2.25m	.95m	300
3.0 x 3.0m	9.6	3.80m	2.25m	.56m	314
3.5 x 3.5m	12.2	3.80m	2.25m	.28m	330

VISTA

General Specifications

Styles: Hexagon, Square, Rectangular, Custom

Canopy Type: Retractable, architectural grade high tensile, PVC canopy

Installation Method

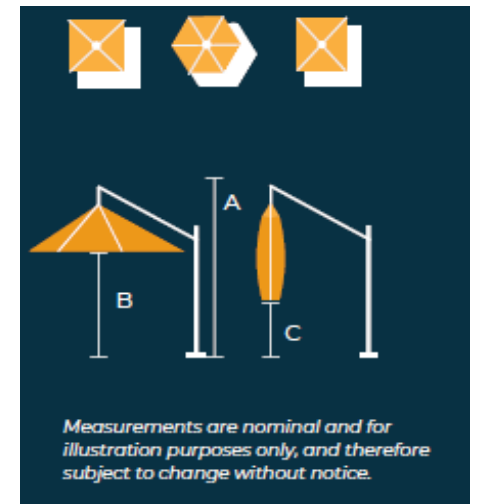

Bolted base plate to concrete slab or footing. Installation by certified installer or competent tradesperson.

Frame Construction: 90mm galvanised structural steel column with structural aluminium arms, marine grade 316 stainless catenary cables and componentry.

Frame Finish: Powder coated in your preferred colour from the Dulux Interpon range.

Engineer Wind Rated: up to 118kph (W33) when open and up to 148kph (W41) when closed.

Compatible Accessories: 360° rotational base, radiant heating, LED lighting, usb/power sockets, and corporate branding.

		Black (s)	0	16	84

*[s] denotes a solid colour without translucency. Darker colours will absorb and transfer more heat. Printed and digital illustrations of our colour range appear differently on screens and in print from the actual shade of the fabric. We recommend viewing a fabric sample to assist in getting the right look and feel for your project.

Frame Colour Options*

An extensive selection of colour options are available from the Dulux Interpon range for the premium powder coat finish of your frame. A sample of the more popular colour choices are shown below. Visit www.duluxpowders.com.au for the full range of commercial powder coat colours, or contact us for a catalogue or samples for your project.
